Education

IITRAM (Institute of Infrastructure, Technology, Research and Management) <i>B.Tech in Computer Engineering</i> – CPI: 7.61 (6th Semester) – Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming	2023 – 2027 (Pursuing) <i>Ahmedabad, India</i>
Kisan College (Bihar School Examination Board) <i>Higher Secondary (XII) – 74.8%, 1st Division</i>	2022 <i>India</i>
S A International Public School (CBSE) <i>Secondary (X) – 80.6%</i>	2020 <i>India</i>

Technical Skills

Programming Languages: C++, JavaScript, Python
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
AI/ML: Machine Learning, Deep Learning
Tools & Technologies: Git, GitHub, VS Code, Postman
Other: Data Structures & Algorithms, JWT Authentication, API Integration, Socket.io, Firebase

Projects

- Rail Madad – Railway Complaint Management System** | *Hackathon Team Project* | *React Native, Node.js, Express.js, MongoDB*
- Collaborated with a hackathon team to engineer a railway complaint management platform spanning two client surfaces – a passenger mobile app and an administrator web dashboard – with OTP-based account registration and verification.
 - Designed a structured complaint-tracking schema capturing 5 key fields (train number, coach number, PNR, category, issue description), persisted in MongoDB and automatically routed to the relevant department.
 - Added dual-channel staff notifications (IVR calls and SMS fallback) so complaint alerts reached staff through a backup route if one channel failed.
 - Delivered an admin dashboard exposing 3 real-time metrics (total, pending, resolved complaints) alongside department assignment and status management.
- Personal Cloud – Cloud Storage & File Management Platform** | *React.js, Node.js, Express.js, MongoDB, Cloudinary/MinIO*
- Engineered a full-stack, Google Drive-inspired cloud storage platform supporting 6 core file operations: upload, store, organize, preview, download, and share.
 - Implemented a 2-tier sharing permission system (viewer/editor) for public and private access, plus file versioning and activity tracking.
 - Built JWT-based authentication and authorization, per-user storage usage tracking, and a dashboard covering files, storage, and sharing activity.
 - Integrated Cloudinary/MinIO for object storage, decoupling file storage from the application server.
- Msgly – Real-Time Secure Mobile Chat App** | *Expo React Native, Node.js, Express.js, Socket.io, Firebase*
- Developed a full-stack real-time chat app (Expo React Native frontend, Node.js/Express.js backend) using Socket.io for live bidirectional messaging.
 - Incorporated 4 features into Msgly – user authentication, blocking/reporting, end-to-end encryption, and Firebase push notifications.
- BlueShare – Secure Offline Bluetooth File Transfer System** | *Team of 2* | *C++/JavaScript, Bluetooth APIs*
- Partnered with a co-developer to create an offline Bluetooth file-sharing app transferring documents, images, and videos between nearby devices without internet or Wi-Fi.
 - Orchestrated a 4-stage transfer pipeline – device discovery, secure passkey-based pairing, file selection, and progress/status tracking – built for offline and low-connectivity use.

Achievements & Interests

- Secured an All India Rank of 81,867 in JEE Main 2023.
- Received the IITRAM Certificate of Appreciation for Academic Performance for securing an SPI of 8.67 in B.Tech 2nd Semester (AY 2023-24).
- Areas of Interest: Full Stack Web Development, Machine Learning, Deep Learning, Data Structures & Algorithms.
- Languages Known: English, Hindi.
